MESSAGE FROM PRESIDENT

It is with immense pleasure that I am introducing 4th Edition of Lloyd Reflections. I would like to offer a word of thanks to our readers, our contributors, and our editorial board for their support of the newsletter and its mission: to address the fundamental and dynamic concepts of pharmaceutical profession in a multidisciplinary framework and if only briefly, the latest achievements of our students and faculty.

We, at Lloyd, are committed to achieving excellence and ensuring success to our students by building their leadership quality, innovative and critical thinking skills. We constantly experiment and innovate in imparting Pharmacy education that gives our

students the qualities like commitment and persistence to achieve goals, virtues and values for pursuing excellence and the will to succeed. Our students have achieved commendable accomplishments in the fields like nanotechnology, molecular biology, genetics etc. We have a lot to look forward to as our institution is effectively maintaining a symbiotic relationship between teaching, learning and the industry requirements. I wish all the success to this endeavour of Lloyd Institute of Management and Technology. Manohar Thairani
President.

- Mr. Manohar Thairani
President, Lloyd

MESSAGE FROM GROUP DIRECTOR

It give me immense pleasure in writing a note for our 4th issue of Pharma Magazine of Lloyd Institute of Management & Technology, Faculty of Pharmacy - Lloyd Reflections.

The most remarkable achievement in the recent past has been NBA Accreditation of Bachelors programme of Pharmacy at Lloyd. This is a huge milestone and places Lloyd on a global platform as provider of world-class education and research, based on Outcome-based teaching methodology. Each and every Lloydian has been a part of this progress and I congratulate my staff and students, present and alumni to have been a part of this fantastic milestone.

In the last year we have had many exciting changes transpiring in our Pharmacy School, from impressive faculty hires, to new certification programmes, to improving the experiences of our students.

This new group of faculty brings outstanding talents and remarkable research activity that will complement the exceptional work done by our current faculty members. Several of our faculty

members are involved in teaching endeavors that have the potential for nationwide impact.

Our industry -focused education has been getting great attention as the new trend in higher education, in research projects at Masters level. We have been proud recipient of Research grant from Dr A P J Abdul Kalam University. At the same time, we continue to be deeply committed to attracting the highest caliber students to our school and offering wonderful educational experiences.

Lloyd Job fest have made us earn name and fame through the last 4 years. It is an amazing feat to see 1500 pharmacy graduates from all across India undergoing interviews for various profiles in 35 top pharmaceutical companies in Lloyd campus..

Thank you to everyone who has contributed in making these changes around the college a reality; these new projects would not have been able to launch without the hard work of faculty, staff, students, and alumni. I look forward to sharing the positive outcomes of the programs and initiatives in future issues of the Lloyd Reflections.

- Dr. Vandana Arora Sethi
Group Director

MESSAGE FROM PRINCIPAL

The 4th edition of the pharmacy newsletter of my Institute, LLOYD REFLECTIONS, is in your hands. Lloyd Reflections has become a chronicler of the academic and extracurricular achievements of the students and faculty of the Pharmacy program, and boy! do we have achievements to share. The last edition of this newsletter was released with NIYUKTI-2018, the 3rd Annual Lloyd Job Fest. It's almost been an year and what a year it has been!

NIYUKTI-2018 saw 1300 students and 35 companies from all over India congregating and more than 250 job offers being made in one single day. We had applied to National Board of Accreditation for accreditation and the Expert Team visited us in November, 2018. It is a highly rigorous process that evaluated us on a very wide range of quality benchmarks viz., academics, exam results, research, publications, quality and quantum of placements, student welfare processes, faculty development policies, achievements outside the realm of academics, collaborations with industry/ research Institutes,

teaching-learning methodology and the governance structure of the Institute.

We are very happy to announce that we are now an NBA Accredited Institute!

There are close to 2000 pharmacy colleges in India and less than 100 of them are NBA Accredited. It speaks volumes about the quality of education and overall learning experience that the students and faculty have created in Lloyd.

Lloyd also organized its 1st Cultural Fest, Lloyd's Carnival-2019, and it was a roaring success with more than 42 colleges/ universities participating that made Carnival-2019 the biggest cultural event in Greater Noida.

The edition in your hand is being released with the NIYUKTI-2019, the 4th Annual Lloyd Job Fest and by the looks of it; it is going to be bigger and better than the last one. At the time of writing these lines, we have 1292 students and 32 companies registered with us.

With a promise to keep up the momentum, raising the bar of quality

- Prof. Abdul Wadood Siddiqui
Principal

SEA BUCKTHORN

- by Shantanu
(4th year, B. Pharm.)

Sea Buckthorn (*Hippophae rhamnoides*) also known as wonder berry, Leh berry, Ladakh gold is a super fruit containing all the Omegas-3, 6, 9 and the rare 7 fatty acids, as well as a host of antioxidants and other healing nutrients. It has been used to heal psoriasis and make skin glow, boost immunity, slow aging, and lower cholesterol. Sea buckthorn has multiple uses due to its protein building amino

acids, vitamins B1, B₂, K, C, A, E, and folic acid, over 60 antioxidants, at least 20 minerals, and healthy fatty acids. The fruit is full of carotenoids, xanthophylls, phenolics, and flavanoids, too. It's an absolute power house of nutrients. Sea buckthorn oil is an important plant food source of polyunsaturated fatty acids, which are an important structural component of mucous membranes.

Health Benefits

- Contributes to proper brain and nervous system functioning
- Improves mental clarity
- Boosts lymphatic circulation and immunity
- Supports internal organs
- Slows the aging process
- Helps to increase cellular vitality

In Cerebral-Cardiovascular Health

Tonic effects to cerebral

In Immune System

Resistance of the human body against pathogens

In Skin Problems

Promote the recovery of various skin conditions, including eczema, burns, bad healing wounds and skin damaging effects of sun

Anti-Oxidant Activity

Keeps the supervisory role of the system normal, thus eliminating the mutant and dead cells caused by free radicals and enhancing phagocytosis of macrophage and killing cancerous cells

Expenditure on R&D in India: A Snapshot

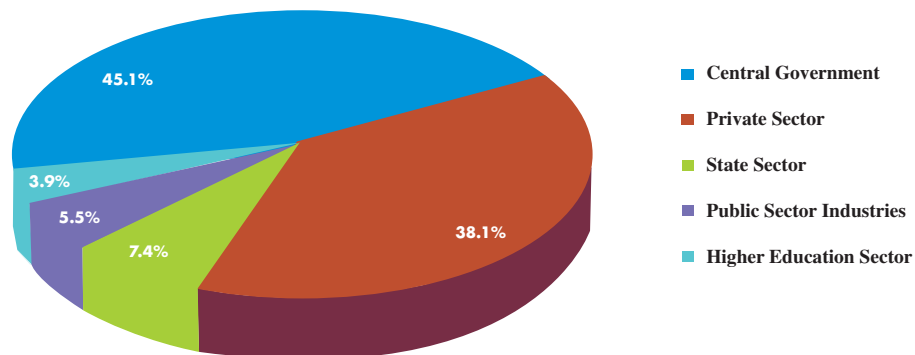

- by Deepanmol Singh
(Assistant Professor)

India occupies third rank in awarding PhDs after China and US, but the expenditure that we do on Research and Development (R&D) is much lower than not only these two, but also South Korea and Israel, as per the Economic Survey 2017-18.

Although the Gross Expenditure on R&D (GERD) of India has more than tripled from Rs. 24,117 crore to Rs. 85,326 crore in the decade from 2004-05 to 2014-15, the percent GDP spend still hovers at 0.6 to 0.7% in the last two decades.

GERD is mainly driven by the government sector, with central government accounting for 45.1 %, state governments 7.4 %, public sector industries 5.5 % and institutions of higher education 3.9 % of the total GERD. The private industry accounted for the balance 38.1 % as shown in the figure below.

National R & D Expenditure sector, 2014 - 15

Comparing the levels of participation of the government of India with those in 13 other countries - USA, UK, Spain, Russia, Korea, Mexico, Japan, Italy, Germany, France, China, Canada and Australia, it found that India topped the list in terms of government participation but it hit the bottom in terms of participation of institutions of higher education.

A significant fact is that 81.3 % of R&D expenditures incurred by central government sources came from just eight major scientific agencies: Defence Research and Development Organisation (DRDO) led the table with a share of 37.8 %, followed by Department of Space (16.6%), Department of Atomic Energy (11.6 %), Indian Council of Agricultural Research (11.4 %), Council of Scientific and Industrial Research (9.5 %), Department of Science and Technology (7.7 %), Department of Biotechnology (2.9 %) and Indian Council of Medical Research (2.4 %) during 2014-15.

Pharmacist as a Patient Counsellor

Health is a state of being free from any illness or injury. It is very important to treat any kind of disease in order to maintain one's health. Physician by checking the signs and symptoms of a particular disease prescribes medication. The patient takes that prescription to the pharmacist who validates the prescription, cross-checks the medication prescribed, provides the medicines and most importantly counsel the patient in order to increase the patient's knowledge about the health issue. This is a very important step because the patient gets to know more about his/her disease and treatment and pharmacist gets to know more about the patient which helps to establish trust between the pharmacist and the patient.

The population of India is about 133.92 crores and according to the Retail Druggist and Chemist Association total number of pharmacies in India is about 550,000 which seems a significantly low number serving the patient nationwide. If any doubts related to the dosage of medication, time of administration are not cleared, the patient may deteriorate his/her health by following the wrong prescription. Let's face it, the writing of doctor while writing a prescription is not understandable sometimes which may lead the pharmacist to give wrong medicine and patient eating the wrong medicines which can be hazardous many a time.

The patient counseling aims to increase the knowledge of patient about the route of administration (if the medicine has any special instruction), time of administration of the medicine, dosage of the medicine (generally the dose for child is less as compared to the adults), and any side effects. Also, the pharmacist should clear any doubts of the patient, if he/she has any, related to the course of medication. The pharmacist should be patient enough to understand the patient, establish trust so that the patient can ask anything to the pharmacist without any hesitation. It is not possible to counsel everyone but the pharmacist should clear any doubt of the patient whenever it deems necessary or if the patient is having any problem. Hence, the counseling plays an important role in understanding more about the problems a patient is facing and the pharmacist clearing his doubts for better diagnosis and treatment.

Synthetic Adulteration in HERBAL MEDICINES

- by Sakshi Sharma
(4th year B. Pharm.)

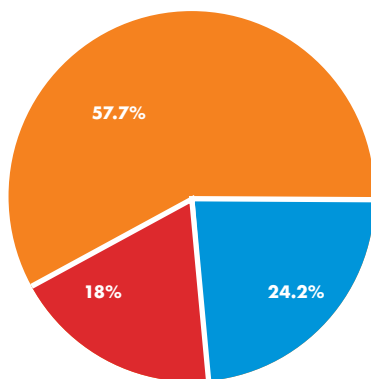

Herbal medicine is also called botanical medicine or phytomedicine. It refers to a plant's seeds, berries, roots, leaves, bark, or flowers used for medicinal purposes. Herbalism has a long tradition of use outside modern or conventional medicine. It is becoming more mainstream as improvements in analysis and quality control along with advances in clinical research show the value of herbal medicine in treating and preventing the disease.

Adulterant	Claim
Famotidine	Digestive disorders
Ibuprofen	Arthritis
Promethazine	Tranquillizer effect
Diazepam	Dysphoria or Insomnia
Captopril	Hypertension
Dextromethorphan	Expectorant effect
Metformin	Anti diabetic effect
Sildenafil	Enhancing sexual performance

They are sold as tablets, capsules, powders, teas, extracts, and fresh or dried plants. People use herbal medicines to try to maintain or improve their health. Many people believe that products labeled "natural" are always safe and good for them. Herbal products owe its popularity due to a myth that they carry no side effects. Moreover, herbal products available claim themselves as pure but studies have shown that they may contain synthetic substances which may cause severe side effects. Some of the most common synthetic adulterants are given in the table on the right side.

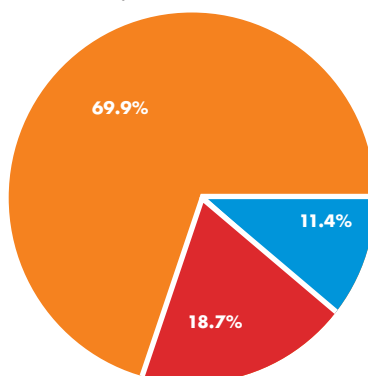

A survey was performed to check the mind set of people towards Herbal medicines. The questions along with the responses are shown below

Ques 1. Which type of medication do you prefer in the day life for treatment ?

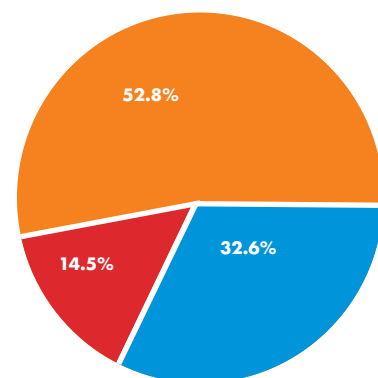

- Allopathy Medication
- Homeopathy Medication
- Herbal Medication

Ques 2. Which one of them do you find the safest ?

Ques 3. Which type of medication do you find most efficient ?

The problem of adulteration in herbal products is due to less stringent regulations. The concerned regulatory authorities should take required measures to curb this issue.

PROBIOTICS: AN OVERVIEW AND ITS THERAPEUTIC APPLICATIONS

- Dr. Lalit Kumar Tyagi
Professor

The gastro-intestinal tract (GIT) flora consists of a highly varied microbial flora. In the late 19th century microbiologist observed differences in the micro flora of gastro intestinal tract of healthy individual and that of diseased person. Several pathological conditions, use of radiation therapy and immunosuppressive therapy may cause a change in the composition of gastro-intestinal flora.

In such a condition introduction of those bacteria that are profitable to gastro-intestinal tract provide an advantageous effect. The term "probiotics" was first coined by "Lilly and Stillwell" in 1965. Probiotics are defined as live micro organisms which are administered in sufficient amount to provide health benefits on the host.

Probiotic bacteria have been investigated in the treatment of various conditions like Crohn's disease, ulcerative colitis and pouchitis etc. Organisms which are commonly used as probiotics include Lactobacillus and Bifidobacterium. Some microorganisms which are used as probiotics are summarized in Table 1.

Table No. 1: List of Microorganism used as Probiotics

SPECIES	MICROORGANISMS	APPLICATIONS
Lactobacillus	1. L.acidophilous 2. L.casei (Rhamnosus) 3. L.fermentum 4. L.gasseri 5. L.johnsonii 6. L.lactis	1. Prevent vaginal yeast infection 2. Prevention of rota virus diarrhoea in children 3. Treatment of urogenital infection in women 4. In therapy of acute diarrhoea 5. Preservation of various food items such as dairy, meat. 6. Treatment of inflammatory bowel disease (IBD)
Streptococcus	1. S.thermophilous 2. S.salivarius	1. Reduces gastro-intestinal disorder 2. Treatment of septicaemia and neutropenia
Sacchromyces	1. S.boulardii	1. Treatment of acute diarrhoea 2. Treatment of irritable bowel syndrome

Probiotics are effective in various clinical conditions such as:

- Inflammatory bowel disease and ulcerative colitis
- Female uro-genital infection and urinary tract infection
- Necrotizing enterocolitis (NE)
- Helicobacter pylori infections
- Surgical infections
- Probiotics in allergic diseases
- Pouchitis

In future, probiotics are likely to emerge as a suitable alternative to conventional antimicrobial therapy. Probiotic therapy has proved to be useful in a number of clinical conditions like inflammatory disease, infectious disease and allergic problems. A careful selection of probiotic agent, its dose standardization and a complete knowledge of its advantageous effect has proved as an efficacious tool for medical therapy. Probiotic therapy may be used in IBD in primary or secondary areas of active mucosal inflammation. They are likely to emerge as an alternative to antimicrobial therapy with lesser number of adverse effects.

Career Guidance Training & Placement (CGTP) Cell - Lloyd

The purpose of the Career Guidance Training & Placement (CGTP) Cell is to define the overall structure and processes of training, placements and outreach. The CGTP cell ensures that –

- Maximum number of students get on-campus placement.
- Deserving candidates can have the opportunity to start their career with their preferred company.
- The team works according to the defined processes to achieve the common objective.

Center For Entrepreneurial and Excellence Development (CEED)

A Department of CEED is formed to bring the experts from Industry so as to develop center for entrepreneurial culture amongst students. the department works under tireless efforts of Mr. Vivek Dhiyani (Coordinator CEED)

Entrepreneurship Development

A lecture on Entrepreneurship Development was organized on 12th September 2018 which was delivered by Mr. Sandeep Kumar Mishra (Owner, Florencia Healthcare). Being an entrepreneur he shared his journey from a job seeker to a job creator. He motivated students to inculcate the skills of an entrepreneur. He also shared the potential opportunities available to become an entrepreneur in the field of pharmacy

Mr. Sandeep Kumar (Alumnus of Lloyd, 2004-2008) addressing the students on Skills Development

Dr. Burande sharing with the students on the new scope of pharmacy

Scope & Potential after Pharmacy

A Workshop on Scope & Potential after Pharmacy was organized on 12th September 2018 which was delivered by Dr. Mahesh D. Burande (Director, Institute of Pharmaceutical Education & Research). Dr. Burande skillfully shared the potential opportunities available in the market. His tremendous personality with hefty voice held all students mesmerized throughout his speech.

JOB FEST 2018 : A Report

Lloyd Group of Institutions organized a national level job fest for the third time on 21st April 2018 on its campus. It was an ideal platform for 1300+ candidates from all over India (including from NIPER, DIPSAR, Chitkara University, Jamia Hamdard, Galgotia, Amity, etc) to seek job opportunities from around 30 national and multinational companies like GlakxoSmithKline, Cipla, Alembic, Aimil, Apollo, Paytm, HDFC, etc. Eminent personalities like Hon'ble DM, Gautam Buddha Nagar, Mr. B.N. Singh, (IAS) and Mr. A.K. Pradhan, Deputy Drug Controller (India) were the Chief Guest and Guest of Honours of the event.

Hon'ble DM, Gautam Buddha Nagar, Mr. B.N. Singh, IAS was impressed by To event and appreciate the Institute for providing such a platform to young candidates. He also gave to the job fest to his blessings to continue and get strengthened in future to become a model for others to follow.

Release of 3rd Edition of Biannual Newsletter
“Lloyd Reflections”

R to L: Mr. Manohar Thairani, President, Lloyd; Mr. Sharma, Recruiter from Apollo Pharmacy; Mr. B.N. Singh, IAS, G.B. Nagar; Dr. Vandana Arora, Group Director, Lloyd; Mr. A.K. Pradhan, Drugs Controller, India; Dr. Abdul Wadood, Principal, Pharmacy Department

Mr. A.K. Pradhan, Deputy Drug Controller (India) congratulated the Lloyd Group for organising the event and encouraged the companies to recruit more and more young professionals.

Lloyd School of Pharmacy released their third edition of Pharma newsletter "Lloyd Reflections" in this event. The companies recruited students in large numbers. More than 200 students got benefited from this job fest and were shortlisted in various sectors of pharmaceutical industry.

Organizing Secretary, Dr. Vandana Arora (Group Director, Lloyd), thanked all the dignitaries and the recruiters and the placement team to bring this job fest to a success. The Chairman of Lloyd Group, Mr. Manohar Thairani said that such activities will keep happening in future also.

WORKSHOP SERIES ON IDEATION

Ms. Reena Bhattacharya
Pharmaceutical
Marketing & Strategy Consultant

Lloyd CEED organized a guest lecture on the topic of "Ideation" for pharmacy & management students on 1st March, 2019. The speaker for the day was Ms. Reena Bhattacharya, Pharmaceutical Marketing & Strategy Consultant. The lecture was thoughtfully organized to provide a view on the process of ideation & encouraging the students to come up with new ideas, which may lead to setting up of new enterprises.

The session started with an introductory note from Mr. Vivek Dhiyani, Cordinator-CEED. In attendance were Dr. Vandana Arora (Group Director.), Dr. Satish Matta (Director-Management.), Dr. Abdul Wadood Siddiqui (Principal-Pharmacy), faculty and students of both the department.

Ms. Reena Bhattacharya started her lecture on Ideation and shared the whole process of idea generation. She also interacted with students and discussed the ideas coming forward from students during the session. Some of the ideas shared by students are given below:

The session ended at 01:00 pm with a thank you note to the speaker and a token of appreciation Presented to the speaker. The participating students were from M. Pharm, B. Pharm, D. Pharm, MBA & PGDM.

After the session it was discussed that the students with potential ideas will be identified and few workshops with defined modules will be conducted for a group of such students.

Oreintation and Inter College Debate competition "VIVAAD"

An Orientation program for the new batch of Diploma and Degree students of pharmacy was organized by Lloyd institute of Management & Technology (Pharm.), Greater Noida, on 28th August 2018. 160 fresh students of B. Pharm. and D. Pharm. of Lloyd attended the orientation. 32 students from 8 different colleges including Ram-eesh, Sharda University, IIMT etc., took part in the debate competition, "Vivaad". The debate was on a very topical issue, "Online Pharmacy vs Traditional Pharmacy".

Students from different colleges arrived at the venue around 9:30 am. Sh. S L Nasa, Registrar, Delhi Pharmacy Council and President-Indian Hospital Pharmacists' Association was the Chief Guest of the event. The event was presided by Sh. Manohar Thairani, President, Lloyd Group, and was inaugurated by the Group Director Dr. Vandana Arora. As part of the orientation of the new students, Mr. Nasa presented the Pharmacist's Lab Coats to all the students.

As a part of his address to the students Mr. Nasa shared the latest news from the Drug Control Department, that pharmacists are now an agent of empowerment to the patients as every pharmacy shop will mandatorily have a dedicated shelf stocked with generic medicines. The patient will have the choice to ask for branded drugs or cost effective generic drugs.

The debate competition, Vivaad-2018, saw some spirited debates where budding pharmacists from different colleges of Greater Noida came to Lloyd and displayed their amazing awareness about the pharmacy profession and laws and regulations governing it. To gist out the conclusion in brief, the students who spoke for the favor of online pharmacy stressed that it is convenient, cheaper, feasible to buy anywhere and at anytime, better knowledge of the product. Those who were in the favor of traditional pharmacy stressed on the risks of fake prescription, misleading naming, and majority under poor economy hence going online itself will be an issue for them.

The prizes were handed over by the President of Lloyd Group of Institutions, Sh. Manohar Thairani. Rishabh of IIMT College won 3rd prize while Nancy of Lloyd Institute stood second. The 1st prize was bagged by Vikas of Rameesh Institute. Two consolation prizes were given to Pragya from Sharda University and Himanshu from Ram-eesh. Lloyd also awarded certificates to all the participants.

Sh. Thairani congratulated the winners and encouraged all the students to keep increasing their knowledge about their profession so that they can get good and high paying jobs when they come again for the Lloyd's Annual Job Fest in 2019. The event was concluded with a group photograph of all the participants and the organizing team followed by the lunch.

Freshers Party 2018

Lloyd family welcomed the new batch of students with a thrilling welcome freshers party. Members of Lloyd's Cultural Club 'The Dot' organized the party. The evening was full of enthusiasm by the freshers as well as the senior students. Sizzling performances, ramp walk, some fun activities were performed by the fresher students. Vaishnavi (B. Pharm 1st year) and Prena (D. Pharm 1st year) were entitled as Miss Fresher along with Yograj (B. Pharm 1st year) and Shivang (D. Pharm 1st year) earned the title of Mr. Fresher.

Celebration Pharmacist's Day

World Pharmacist's Day was celebrated at the Lloyd Institute on 25th September 2018 to advocate and appreciate the role of pharmacists in improving health conditions around the world. To celebrate the Day various events like Health screening camp, Blood donation camp and Poster competition were organised in the Lloyd's campus. Students showed great enthusiasm to be a part of health check-up team and successfully accomplished their goal. . The blood donation drive was organised by the Rotary Club of Noida & the session started with a small speech from the club members about blood & people in need of blood. Hence, starting the donation drive for a much greater cause.

The last session of the day witnessed the artistic effort by the students in the form of posters. In addition to the health camp & blood donation, poster making competition was organized for the students. In the poster competition which started at 1:30 pm, 15 teams participated and the winners were screened on the basis of a strong verbal debate on the theme. All M.Pharm, B.Pharm & D.Pharm students were involved in this event. Vivek & Danish (D.Pharm 1st year) stood first, ajay (B.Pharm 2nd year) achieved the second position & lastly, Charu & Adarsh (B.Pharm 1st year) were the 2nd runner up. The event was successfully organised by the team of faculty members and student volunteers of pharmacy department.

INTER-COLLEGE SPORTS FEST-2019

"Lloyd Champions League- 2019", Lloyd's 3rd annual inter-college sports meet was held at the Lloyd's campus from 7th to 9th March 2019. The sports meet was inaugurated on 7th March by the District Jailer of G. B. Nagar, Mr. Satya Prakash while the students took an oath to treat this event as a symbol of sincere and healthy competition. Students from various colleges like, G.N.I.O.T, G.L. Bajaj, Galgotias Institute, G.B.U., J.I.M.S, H.I.M.T, N.I.E.T., Accurate, Mangalmay and Skyline participated in the indoors and outdoors sports.

Mr. Anand Kumar Singh, Social Welfare Officer of G.B.U., was the Chief-Guest of the Valedictory function. The winners and participants were felicitated by the Chief Guest. The three day event was concluded around 5:00 p.m. with a quick photo session. An overwhelming response by the students throughout the event signified their admiration for the sports fest and competition spirit.

Lloyd's Carnival

Lloyd Group of Institutions organised its Annual Cultural Fest, "LLOYD CARNIVAL-2019" on 29th March, 2019. It was a daylong event held in the campus. The Carnival was declared open by the Group Chairman, Sh. Manohar Thairani, who welcomed teams from different colleges and stressed upon the importance of such activities for the holistic development of the students.

The Carnival saw a wide range of activities like Ad-Mad show, rangoli, T-Shirt painting, mimicry, PUBG War, poster making, solo singing, mehndi, fashion show, solo dancing and group dancing.

About 1050 students from 42 universities, B-colleges and technical institutes of Delhi-NCR gathered on the Lloyd Campus to exhibit their talent and skills in various art forms.

The event had a soul to it - vibrant, contagiously colorful and exuberant with mesmerising music, finger-licking-good street food and much more!

This full of energy and dazzle event concluded with a quick award ceremony for all the winners of the day. The top ranking students of previous session were also awarded the annual scholarship cheques.

In the academic awards, Mittal Kumari, Akansha, Sanya Bhateja and Christina Joseph of Pharmacy received cheques of Rs. 10,000/- each for securing 1st position in their respective years.

In the cultural events, Team from St. Thomas College won the 1st position in the Ad-Mad show, while the team from Lloyd was the runner up. Neha Anwar & Neha of Lloyd won the Rangoli competition. Aman Tiwari of GL Bajaj won the intensely fought PUBG war

In the poster making competition, Shubhangi & Garima of Lloyd Law College were the winners.

Longhua Wangpan of Lloyd Business School won the T- Shirt painting competition.
